## **2 OVERVIEW**

### **2.1 Introduction**

---

The City of Lodi ("City") proposes to levy special benefit assessments for the Lodi Consolidated Maintenance District No. 2003-1 ("District") for Fiscal Year 2005/06. The City currently has consolidated seven landscape maintenance districts into a single district, the "Lodi Consolidated Landscape Maintenance District No. 2003-1". In response to the provisions of the California Constitution Article XIIC and XIID (Proposition 218), in 2003 a separate Engineer's Report was prepared each of the first two Zones (Zones 1 and 2) of the Lodi Consolidated Landscape Maintenance District. The City conducted property owner balloting proceedings for the assessments in Fiscal Year 2004/05. After approval of the assessment by the property owners, the City began to levy and collect special assessments on the County tax rolls to provide continued funding for the costs and expenses required for maintenance of the improvements within the District. In 2004 a separate Engineer's Report was prepared for each of the next five Zones (Zones 3 thru 7) of the Lodi Consolidated Landscape Maintenance District. The City conducted property owner balloting proceedings for Zones 3 and 4 for the assessments in Fiscal Year 2004/05 and the City conducted property owner balloting proceedings for Zones 5 through 7 for the assessments in Fiscal Year 2005/06. After approval of the assessment by the property owners, the City will levy and collect special assessments on the County tax rolls to provide continued funding for the costs and expenses required for maintenance of the improvements within the District. The District is levied pursuant to the Landscape and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the Act), and in compliance with the substantive and procedural requirements of the California Constitution Article XIID.

This Engineer's Report ("Report") describes the District and assessments to be levied against properties within the District for Fiscal Year 2005/06. The assessments described herein are based on the estimated cost to operate, service and maintain improvements that will provide a direct and special benefit to properties within the District. All improvements to be operated, serviced and maintained through annual assessments were constructed and installed in connection with the development or for the benefit of these properties. The annual costs and assessments described herein include all estimated direct expenditures, incidental expenses, deficits, surpluses, revenues, and reserves associated with the maintenance and servicing of the improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessment Number by the County of San Joaquin Assessor's Office. The County of San Joaquin Auditor/Controller uses Assessment Numbers and specific Fund Numbers to identify properties assessed on the tax roll for special district benefit assessments.

At a noticed Public Hearing, the City Council considered all public comments and written protests presented. Upon conclusion of the Public Hearing, the City Council determined that no valid protest existed. By resolution, the City Council approved the Engineer's Report as submitted or amended (amendments may not increase the assessments approved by the property owners). Following approval of the Report, the City Council, by resolution, confirmed the assessments and ordered the levy and collection of assessments pursuant to the Act. The assessments as approved will be submitted to the San Joaquin County Auditor/Controller to be included on the property tax roll for each parcel for Fiscal Year 2005/06.

## **2.2 Effect of Proposition 218**

---

On November 5, 1996, California voters approved proposition 218 by a margin of 56.5% to 43.5%. The provisions of the Proposition, now California Articles XIII C and XIII D, add substantive and procedural requirements to assessments, which affect the City of Lodi landscape maintenance assessments.

The proposed assessments for the City of Lodi Consolidated Landscape Maintenance District No. 2003-1 for Fiscal Year 2005/06 are not proposed to increase over the annual rate escalation factor of the annual San Francisco Bay Area C.P.I. or 5%, which ever is greater, which was approved by property owners following the assessment balloting procedures set forth in Section 4 SEC. 4 of the Proposition.

## **4. METHOD OF APPORTIONMENT**

### **4.1 Method of Apportionment**

---

Pursuant to the 1972 Act the costs (assessments) of the District are apportioned by a formula or method that fairly distributes the net amount to be assessed among all parcels in proportion to benefits received from the improvements. The provisions of Article XIII C and XIII D of the California Constitution (Proposition 218) require the agency to separate the general benefit from special benefit, whereas only special benefits may be assessed.

#### **IMPROVEMENT BENEFIT FINDINGS**

The annual assessments outlined in the Budget section of this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration and maintenance within the District, by Zone. It has been determined that each assessable parcel within the District receives proportional special benefits from the improvements. All improvements to be maintained and funded through annual assessments were constructed and installed in connection with the development of properties within the District, and each parcel's close and relatively similar proximity to the improvements makes each parcel's special benefit from the improvements similar and proportionate. All the lots and parcels that receive special benefit from the improvements are included within the District.

#### **SPECIAL BENEFITS**

The method of apportionment (method of assessment) is based on the premise that each of the assessed parcels within the District receives special benefit from the improvements maintained and financed by District assessments. Specifically, the assessments associated with each Zone are outlined, by Zone, in Section 3 of this Report.

#### **DESCRIPTION OF THE METHOD OF APPORTIONMENT**

The District provides operation, service and maintenance to all the specific local improvements and associated appurtenances located within the public right-of-ways in each of the various Zones throughout the District. The annual assessments are based on the historical and estimated cost to operate, to service and to maintain the improvements that provide a special benefit to properties within the District and Zones. The various improvements within each Zone are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

The assessments outlined in this section represent the proportionate special benefit to each property within the District and the basis of calculating each parcel's proportionate share of the annual costs associated with the District/Zone improvements. The costs associated with the maintenance and operation of special benefit improvements shall be collected through annual assessments from each parcel receiving such benefit. The funds collected shall be dispersed and used for only the services and operation provided to the District.

The basis of determining each parcel's special benefit utilizes a weighting formula commonly known as a Dwelling Unit Equivalent Factor (dueF). The developed single-family residential parcel is used as the base unit for calculation of assessments and is defined as one (1.00) dueF. All other property types are assigned a dueF that reflects their proportional special benefit from the improvements as compared to the single-family residential parcel (weighted comparison).

To determine the dueF for commercial/office parcels, and multiple-residential (greater than 3 units) parcels, a Benefit Unit Factor (BUF) is assigned to each property type. This BUF multiplied by the parcel's specific acreage determines the parcel's specific dueF. For those commercial/office parcels that are less than 7.5 acres, the corresponding BUF is multiplied by a minimum acreage of 7.5 acres. For those non-residential parcels that are greater than 15.00 acres the corresponding BUF is multiplied by a maximum of 15.00 acres. The following table provides a listing of the various land use types and the corresponding BUF used to calculate a parcel's EDU and proportionate benefit:

## **4.2 Land Use Benefit Factors**

<b>PROPERTY TYPE LAND USE</b>	<b>ASSIGNED BENEFIT UNIT FACTOR</b>
Single Family Residential	1.00 per Unit
Multiple Family Residential (duplex)	2.00 per Unit
Multiple Family Residential (greater than 3 units)	5.00 per Acre
Commercial/Office	
For the First 7.5 Acres	5.00 per Acre
For the Next 7.5 Acres	2.50 per Acre
For All Acreage Over 15 Acres	1.25 per Acre
Exempt	0.00
Other Uses	The dueF Will Be Established As Required

## ASSESSMENT RANGE FORMULA

Any new or increase in assessments require certain noticing and meeting requirements by law. Prior to the passage of Proposition 218, legislative changes in the Brown Act defined the definition of "new or increased assessment" to exclude certain conditions. These conditions included "any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed." This definition and conditions were later confirmed through SB919 (Proposition 218 implementing legislation).

The purpose of establishing an assessment range formula is to provide for reasonable increases and inflationary adjustments to annual assessments without requiring costly noticing and mailing procedures, which could add to the District costs and assessments. As part of the District's proposed assessment for Fiscal Year 2003/04 and Fiscal Year 2004/05, balloting of property owners was required, pursuant to Proposition 218. The property owner ballots included an assessment to be approved, as well as the approval of an assessment range formula. Property owners within the District approved the proposed assessment and the assessment range formula.

The assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment (levy per unit or rate) for the current fiscal year is less than or equal to the "Maximum Assessment" (or "Adjusted Maximum Assessment"), then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment is equal to the initial Assessment approved by property owners adjusted annually by the following criteria:

1. Beginning in the second fiscal year (Fiscal Year 2004/05 and Fiscal Year 2005/06) and each fiscal year thereafter, the Maximum Assessment will be recalculated annually.
2. The new adjusted Maximum Assessment for the year represents the prior year's Maximum Assessment adjusted by the greater of:
  - (a) Five percent (5.0%); or,
  - (b) The annual increase in the Consumer Price Index (CPI)

Each year the annual increase in the CPI shall be computed. The increase in CPI is the percentage difference between the CPI of December, 2004 and the CPI for the previous December as provided and established by the Bureau of Labor Statistics (FY 2005/06 CPI increase is 2.2%). This percentage difference (annual difference) shall then establish the allowed increase based on CPI. The Consumer Price Index used shall be based on the CPI established by the Bureau of Labor Statistics for all urban consumers for the San Francisco-Oakland-San Jose Area. Should the Bureau of Labor Statistics revise such index or discontinue the preparation of such index, the City shall use the revised index or comparable system as approved by the City Council for determining fluctuations in the cost of living.

If CPI is less than five percent (5.0%), then the allowable adjustment to the Maximum Assessment is five percent. If CPI is greater than five percent (5.0%), then the allowable adjustment to the Maximum Assessment is based on CPI. The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment (rate per levy unit) less than or equal to this Maximum Assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

The following table illustrates how the assessment range formula shall be applied. For example, if the percentage change in CPI is greater than five percent (5.0%), as in Example 1, then the percentage adjustment to the Maximum Assessment will be by CPI. If the percentage change in CPI is less than five percent (5.0%), as in Example 2, then the percentage adjustment to the Maximum Assessment will be five percent (5.0%).

### Examples of Percentage Increases

Example	CPI Calculated Percentage Increase	Standard 5% Increase	Maximum % Increase Without Re- Balloting	Prior Years Maximum Rate Per dueF	Allowed Adjustment Per dueF	Allowed New Maximum Rate Per dueF
1	5.25%	5.00%	5.25%	\$403.00	21.16	\$424.16
2	2.20%	5.00%	5.00%	\$403.00	20.15	\$423.15

As previously illustrated, the Maximum Assessment will be recalculated and adjusted annually. However, the City Council may reduce or freeze the Maximum Assessment at any time by amending the Engineer's Annual Report.

Although the Maximum Assessment will normally increase each year, the actual District assessments may remain virtually unchanged. The Maximum Assessment adjustment is designed to establish a reasonable limit on District assessments. The Maximum Assessment calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjustment maximum amount. If the budget and assessments for the fiscal year does not require an increase, or the increase is less than the adjusted Maximum Assessment, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment then the assessment is considered an increased assessment. To impose an increased assessment the City Council must comply with the provisions of Proposition 218 (Article XIII D Section 4c of the California Constitution). Proposition 218 requires a public hearing and certain protest procedures including mailed notice of the public hearing and properly owner protest balloting. Property owners through the balloting process must approve the proposed assessment increase. If the proposed assessment is approved, then a new Maximum Assessment is established for the District. If the proposed assessment is not approved, the City Council may not levy an assessment greater than the adjusted Maximum Assessment previously established for the District.

## **5. ESTIMATE OF COSTS**

### **5.1 Description of Budget Items**

---

The following items make up the Estimate of Costs used in determining the Annual Assessments of the District. The specific Zones within the District are shown in Section 3 of this Report. Definitions of maintenance items, words and phrases are shown below:

**Fiscal Year** – One year period of time beginning July 1<sup>st</sup> of a given year and ending June 30<sup>th</sup> of the following year.

**Landscape Maintenance Labor** – The estimated cost of labor necessary for maintaining and servicing the trees, shrubs, turf and ground cover areas within the District.

**Maintenance Materials & Supplies** – The estimated cost of materials necessary for maintaining, cleaning and servicing the landscaped areas and parklands within the District.

**Irrigation Water** – The cost of water used for irrigating the landscaping improvements of the District.

**Utilities** – The cost of electricity used for irrigation within the District.

**Equipment Maintenance & Operation** – The cost of materials and labor necessary for maintaining, repairing, and operating equipment (includes vehicles, benches, playground equipment, graffiti and litter removal, etc.) used for all aspects of maintenance in the District.

**Maintenance Personnel** – The estimated cost for District personnel to perform maintenance duties within the District.

**Contract Maintenance** – The estimated cost to perform contracted maintenance duties within the District.

**Consultants** – Costs associated with outside consultant fees in order to comply with Assessment Law and placement of assessment onto the San Joaquin County Tax Roll each year.

**County Administration** – Costs of the County of San Joaquin related to the placement of assessments on the tax roll each year.

**Insurance** – The estimated costs to provide insurance for District personnel and staff.

**Reserves/Contingencies** – An amount of 50% of the maintenance costs may be included to build a Reserve and Contingency Fund. The Landscaping and Lighting Act of 1972, Part 2, Division 15 of the Streets and Highways Code of the State of California, commencing with Section 22500, allows the District assessments to "...include a reserve which shall not exceed the estimated costs of maintenance and servicing to December 10 of the fiscal year, or whenever the city expects to receive its apportionment of special assessments and tax collections from the county, whichever is later."

**Total Parcels** – Represents the total number of parcels physically within the District/Zone boundaries.

**Total Dwelling Unit Equivalent Factor** – Dwelling Unit Equivalent Factor (dueF) is a numeric value calculated for each parcel based on the parcel's land use. The dueF shown in the District/Zone budget represents the sum total of all parcel dueF's that receive benefit from the improvements. Refer to Section III for a more complete description of dueF's.
